Steve, as we discussed at the table, the Company is not willing to make any wage or benefit adjustments for this cycle. We propose that wages and benefits remain status quo until October 1, 2019, at which time we propose the following:

Wages 2.5% increase, to \$28.31

Health and Welfare increase from \$4.18 to \$4.25

Personal/sick leave 56 hours

As I told you today, I have a little flexibility left with these numbers, if we get close to making a deal. I'm willing to entertain a reasonable counter, bearing in mind that the Federal Government has announced a wage freeze for its own employees. Let me know your thoughts.

Best regards,

Laura Hagan
